

Hello and welcome to today's AGM on August the 13th 2022.

I would like to remind all that the SFLOA mandate includes ongoing care and maintenance of Sherwood Forest Road and rights of way to the lake. This forum is not for airing neighbor grievances.

Road bushing was last completed in the fall of 2020. This work to be completed every two years. We will make arrangements to be done this fall.

With the high speed internet Infrastructure completed on our road this past winter, our power lines are now in good shape from the Windsor Road to Dwight's, including all lines that run to the majority of properties.

The executive decided during the winter meeting that we would forgo any road grading and look to volunteers to do pothole filling for the 2022 season. I would like to personally thank all those involved in helping maintain our road this year. Please raise your hands so we can acknowledge your great efforts.

A work party spent time cleaning up the right of way across from Rebecca and Marcos, thank you to those involved.

Mother nature wreaked some havoc this year, thanks to Kevin and Nancy for clearing all the downfall on our roads and for the neighborhood.

Our garbage shed metal cladding 1, Bear 0 this spring. He huffed and puffed and did do some minor damage, which Peter repaired, thank you. Thanks to Kevin and Nancy for painting the recycle shed and planter. Peter also installed our new signage.

Our culvert repair last summer has worked fantastic over the winter and spring. No road flooding this year. We did note the minor ground seepage in the spring causing some trickle. A possible solution we are thinking about is ditching a small piece for the run off to go. If you haven't our turtle pond sign, please do stop and have a look. Thanks to Peter Signage Inc for this great piece.

Our introduction of the messenger chat channel has certainly provided some positive communication in the Forest, like winter plowing information, neighbor ideas and support, and a virtual presence within our hamlet in the 21st century. Perhaps Brenda and Cece can take us into the 22nd century with their expertise and fresh eyes?

Lastly, I wish I could have been here today for the meeting. I have recently found my true calling working in continuing care at South Shore Regional hospital. Providing support and help within the health-care system I find truly rewarding work. So much so, I need to rediscover that balance of less work and more time off at home within the Forest.

Sincerely, Robert
